

Global Dialysis has four main goals:

- To improve information for dialysis users around the globe,
- To improve access to facilities for dialysis users around the globe,
- To strive for the highest possible quality standards in dialysis care around the globe
- To encourage moves towards an increasingly sustainable dialysis industry

Our core values

- To represent the needs of dialysis users across the globe, professionally
- To understand and work with diversity of culture, creed and people of all abilities across the globe
 - To operate our website fairly and independently
 - To listen to dialysis users, enable access to current information and encourage dialogue with their medical teams to help them manage their care and make the right choices
 - To work in partnership and collaboration with dialysis centres, the dialysis industry and the people that work within it for the good of dialysis users.

Key interests of ours

- Quality standards within dialysis centres
- [Sustainable, green nephrology](#)
