

Global Dialysis has been going since 2000 and has firmly positioned itself as a leading source of information and advice about the dialysis world. Here are a few comments from lots of happy people we have dealt with over the years:

I thank you so much for your help. I had a transplant on march 1st at Cambridge. I used your site for dialysis last year for James paget Yarmouth and Innsbruck, Austria. Great site and wish you well, please feel free to use my recommendation. **Many thanks James December 2011**

*Thank you so much. This is very helpful information. I appreciate your promptness. Thank you, thank you, thank you! Sincerely* **Mary LISCW 14/12/2010 USA**

*Due to your **excellent assistance**, I have managed to arrange dialysis in London and in Paris without missing a beat on my dialysis schedule.* **"Dialysis is an opportunity to live, it is not a death sentence."**

*I try to convey that to people having a difficult time accepting living with renal failure. My own mother died last September while having a dialysis session. She gave up on life shortly after learning she had to go on dialysis. I hope my taking this trip will inspire more people to be grateful for the opportunity modern medical technology offers in continuing to have a "great" life.*

Thank you so very much.
